VersionTracker MacOS X - Extracts

An die Lotus Notes - Benutzer (u.a. beim SWR):

Da Lotus Notes erhebliche Schwierigkeiten hat, diesen Newsletter (wie auch andere Emails) auch nur im Ansatz korrekt darzustellen, gibt's den aktuellen Newsletter unter folgender URL als PDF auch zum Download:

<<http://www.Maik-Waschfeld.de/howto/DA-Mac OS X/DA-Mac OS X - 2003-09.pdf>>.

Leitet diesen Newsletter bitte auch an eventuelle weitere Interessenten weiter.

Audio- + MIDI-Soft-/Hardware (kommerziell):

*** Emagic - SoundDiver 3.0.5.1 Subrelease (OS 9)**

To: sounddiver-users@yahoogroups.com
From: Michael Haydn <mhaydn@mail.emagic.de>
Subject: [SoundDiver] SoundDiver 3.0.5.1 available for download

New SoundDiver Subrelease for Mac OS 9 and Windows.

This update contains new support for

- Ensoniq ASR-X and ASR-X Pro
- Korg KARMA V2.0
- Korg microKORG
- Roland VG-88
- Roland XV series: "Complete Orchestra", "Ultimate Keys", "Platinum Trax" and "World Collection" boards.

This update fixes problems and contains enhancements for devices

- Clavia Nord Lead 2/3
- Ensoniq MR and ZR series
- Korg Triton and Triton Le series
- t.c. devices
- Waldorf microQ, Q series and rackAttack
- Yamaha SY77/99, TG77

The archive file contains only those files which have changed since version 3.0.5. To install this update, first install version 3.0.5, then copy the files found in this archive file, overwriting files with the same name .

<<ftp://ftp2.emagic.de/pub/sounddiver/macOS/sd3051.sit>>

Sonstige Software:

*** DEVON technologies - DEVONthink Personal Edition 1.6**

Finally, DEVONthink Personal Edition 1.6 is ready. We've used the time well and made it faster, much faster. And not to stop here, we've reduced its memory footprint, so it should run even faster in low-memory-conditions.

Besides that, we've made a 'real' documentation again, optimised for both, screen and print, added a PDF service to 'print' directly into the DEVONthink knowledge base and implemented links. This allows you to integrate any file you want into your DEVONthink world. The search field in browser windows now allows to use boolean and wildcard operators, a 'Move to' contextual menu command helps to move contents to other groups and imported PDF files can be converted to plain text.

Other improvements include minor interface changes and some bug fixes. DEVONthink 1.6 runs again on Mac OS X 10.1.

[...]

EasyFind is an alternative to or supplement of Sherlock and finds files, folders or contents in any file without the need for indexing. This is especially useful if you are tired of slow or impossible indexing, outdated or corrupted indices or if you are just looking for missing features like case sensitive or insensitive search, boolean operators, wildcards or searching for phrases. Additionally, EasyFind 2.7 features tight integration with DEVONthink.

[...]

Do you have hundreds of pictures you want to create thumbnails for? ThumbsUp is a simple, drag-and-drop based utility to create thumbnails for a bunch of pictures and supports all image formats of Mac OS X and Quicktime (including PDF documents). In addition size, quality and antialiasing are configurable. And best of all: it's freeware.

[<http://www.devon-technologies.com/freeware.php>](http://www.devon-technologies.com/freeware.php)

Besonders das "ServicePack" versorgt mit einigen recht nützlichen Services.

Mac OS X Orientation

Welcome to our FREE orientation tutorials for Apple Computer's Mac OS X version 10.2 (Jaguar). The future of the Mac OS is now, featuring a UNIX core, a stunning new interface, and backward compatibility with existing Mac OS applications. Our subscription library also includes Terminal Velocity, our introduction to the OS X command line interface, as well as our Mac OS X Tips & Tricks series.

- http://www.atomiclearning.com/whats_new

iMovie 3

Apple has followed up its groundbreaking iMovie 2 with the iLife series, anchored by the all-new iMovie 3. Our free iMovie 2 tutorials continue to be FREE. Our iMovie 3 series features a dozen FREE tutorials (below), plus over 40 more tutorials for Atomic Learning subscribers.

Macromedia MX Applications

Macromedia's MX Studio applications, including Dreamweaver MX, Fireworks MX, and Flash MX, are outstanding tools for creating web sites, graphics, and animations.

Die einzelnen Quicktime-Movies sind zwar nicht besonders groß, max. 650 kB, aber da es z.B. bei der "Mac OS X Orientation" 36 davon gibt und diese insgesamt knapp 13 MB belegen, scheint eine schnelle Leitung angeraten.

* **Yahoo! Groups - Surface_Control**

<http://groups.yahoo.com/group/Surface_Control>

Description

Dedicated to all the people using Surface Control with music software on a PC/MAC.

Category: For Musicians

If you have a Mackie, Kenton, Evolution, Waveidea, JL Cooper, Doepfer, Steinberg, Cubase, Acid, Cakewalk, Sonar, Emagic, Logic Audio, Native Instruments, Kontakt, Pro-53, Reaktor, Battery, Absynth, Spektral Delay, PropellerHead, ReBirth, reason, Fruity Loops, E Jay, DigiDesign, Pro Tools, TC Works, Emagic, MOTU, buzz, Audiomulch, Bitheadz, Fruity Loops

You Must join us!!!

* **Kommunikation mit Schweizern**

Aus der MUS.Infoline (Mac-Newsletter aus der Schweiz):

Es gab vom Duden-Verlag mal ein Taschenbuch mit dem Titel "So sagt man in der Schweiz". Das ist für jeden Deutschen, der mit Schweizern korrespondieren will, unerlässlich... ;-))
